

The POWER behind better performance.

Behlman Power Products

◀ **Standard, Modified Standard,
Custom and COTS Power Solutions**

The **POWER** Behind Better Performance...

Behlman power products perform in an extremely wide range of commercial, industrial and military applications, in even the most demanding environments. Since the early 1950s, Behlman has provided rugged, efficient and highly-reliable power systems, ranging from a few watts to over 120,000 watts.

Whether your application calls for one of our standard, modified standard or custom power solutions, Behlman adds value by ensuring that the solution and service we provide

meets or exceeds your expectations. We consider it our responsibility to take your requirement and provide the best performance and cost efficient power solution.

From dedicated engineering support focused on your specific needs, to a broad product line ready for prompt delivery, to service that sets the industry's highest standard, Behlman offers the right solutions for your power applications.

Aerospace/Avionics

Defense

Gas and Oil Exploration

Ground Support

Motor Testing

Production Test (ATE)

Railroad

Shipboard

Utility Automation

◀ **COTS**

AC-AC • Frequency Converters • Inverters • DC-DC • AC-DC • DC-AC • UPS

**...in a Broad
Range of
Industries**

The right solution for your specific application... every time.

Whether you require the simple integration of a modular power supply or a complex, application-specific design, Behlman turns your specifications into deliverable products — on time and on budget.

Behlman can often meet your requirements with one of our wide range of proven **standard** power products for commercial, industrial and military applications. If your needs cannot be met by one of our standard products, Behlman's innovative engineering capabilities enable us to rapidly configure one of our many existing designs to deliver a **modified standard** power product that meets your specific requirements — providing a “customized” solution more quickly and economically than a full-custom design.

For applications requiring unique solutions — whether new designs or build-to-print — Behlman is a proven leader in providing high-quality, quick turnaround, low-cost **custom** power products. Our design engineers are also experts in reverse engineering and in modernizing old or obsolete power products, making us the ideal solution for protecting your investment and extending the life of your existing equipment.

Proud to provide power supplies for **COMMERCIAL** and **INDUSTRIAL** applications

Production Test • Gas and Oil • Railroad • Utilities
Airborne • Shipboard • Ground • Mobile

Proud to provide power supplies meeting U.S. Govt. **COTS** requirements
