FOR IMMEDIATE RELEASE

ORBIT INTERNATIONAL'S POWER UNIT SEGMENT
RECEIVES \$1,750,000 IN NEW ORDERS TO SUPPORT
F/A-18 AIRCRAFT

Hauppauge, New York, June 15, 2004—Orbit International Corp. (NASDAQ:ORBT) today announced that the custom division of its Power Units Segment, Behlman Electronics, Inc., (“Behlman”) has received orders for approximately \$1,750,000 from Raytheon Systems Company (NYSE:RTN) to build power supply assemblies for the Forward Looking Infrared Radar (“FLIR”) system for the F/A-18 aircraft. Deliveries under these contracts are expected to begin in the fourth quarter of 2004 and continue through the second quarter of 2005.

The F/A-18 Hornet is a twin engine, mid-wing, multi-mission, all weather fighter and attack aircraft used by the U.S. Navy and Marine Corps. Behlman has previously supplied these power supplies to both Raytheon and the U.S. Government and since 2001 has received over \$7,500,000 in contracts in support of the F/A-18 program.

Dennis Sunshine, President and CEO of Orbit, commented, “We are pleased to receive these new orders from Raytheon and continue to work closely with both Raytheon and the U.S. Government in support of this program. We remain confident that our ability to continue to provide the high level of support these customers require will lead to future business on this program in years to come. Considering the large number of F/A-18's that are currently in service, the business potential for this program could be enormous for our Company. The Company continues to see a large success rate in repeat orders and along with new business opportunities, remains optimistic that operating results will continue to increase in 2004.”

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units, AC power sources, frequency converters, inverters, uninterruptible power supplies and associated analytical equipment. The Behlman custom division designs, manufactures and sells power units and electronic products for military and high-end industrial usage. For a more detailed discussion of the risks inherent in the Company's business the reader is referred to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2003.

This press release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including the expected delivery dates under new contracts, that the

Company will continue to provide the high level of support to its customers and will continue to receive future business on the FLIR program for years to come, the enormous business potential of securing future business on this program and the expectation that operating results will continue to increase in 2004. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual future results of the Company to be materially different from such forward looking statements. Factors that might result in such differences include, without limitation, the current economic climate and military conflicts, variable market conditions and changing needs of the defense sector and the Company's customers. The forward-looking statements contained in this press release speak only as of the date hereof. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
