BEHLMAN ELECTRONICS EARNS RAYTHEON'S "OUTSTANDING SUPPLIER AWARD"

Design engineering expertise and dedicated customer service solves obsolescence challenges for Navy's F/A-18 FLIR systems

Hauppauge, New York, September 19, 2005 – Behlman Electronics, Inc., known for its leadership in providing power products for industrial, commercial and military applications, has received Raytheon Company's **Outstanding Supplier Award** as a result of Behlman's performance in providing six different build-to-print power supply modules used in the Navy's F/A-18 Forward Looking Infrared Radar (FLIR) systems.

Raytheon awarded Behlman an initial contract in 2004 to manufacture the FLIR power supply assemblies, and added a follow-on contract in 2005 for additional modules due to Behlman's demonstrated ability to meet Raytheon's and the Navy's stringent requirements for quality, delivery and customer service.

Behlman's performance on both contracts earned the company Raytheon's prestigious award. "We're proud to be recognized by Raytheon for what we accomplished, and the way we accomplished it for them," explained Behlman Vice President of Sales Ron Storm. "These build-to-print contracts presented a spectrum of challenges. There were obsolete parts no longer available that needed replacement, PWB artwork and other drawings were missing, transformers had to be reverse engineered and test data was unavailable...our design engineers really had their work cut out for them."

Relying on the company's more than 40 years of design engineering experience, including both COTS and Mil-Spec power supplies for all branches of the armed forces, Behlman delivered build-to-print power supplies meeting all of the Navy's specifications for size, weight and performance. "We take pride in being able to

help the military extend the life, reduce ownership costs and improve the performance of its legacy systems whenever possible," continued Storm. "Being recognized for our ability to do so is a welcome confirmation that we're staying true to our company mission."

Behlman Electronics Inc., a subsidiary of Orbit International Corp., manufactures and sells high quality standard, modified standard, custom and COTS power solutions, including AC power supplies, frequency converters, inverters, DC-DC, AC-DC, DC-AC, and uninterruptible power supplies.

Orbit International Corp., (NASDAQ:ORBT), based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications.
