**Behlman's RUPS-1250 UPS delivers ultra-reliable uninterrupted power from any worldwide AC, as well as from aircraft and shipboard power**

*True on-line Uninterruptible Power Supply is ideal for remote and difficult-to-access locations*

*Hauppauge, New York, April 10, 2008* — Behlman Electronics Inc., known for its leadership in providing power products for industrial, commercial and military applications, has introduced the Behlman RUPS-1250; a true on-line Uninterruptible Power Source (UPS) that supplies a clean, regulated 115 VAC from any worldwide mains, as well as from aircraft and shipboard power. The latest addition to Behlman's power products, the rugged, compact, rack mountable RUPS-1250 delivers the superior reliability and performance required for remote and difficult-to-access power systems.

The Behlman RUPS-1250 is a 1250 VA UPS with a number of exceptional standard features, including PFC input, hot-swappable batteries (from the front panel), alarms with contact closure, RS-232 interface for monitoring and control and cold start (start on DC) capability. Its input is power factor corrected with Galvanic Isolation; output is a sine wave with frequency conversion capability, and can supply a fixed frequency of either 50 Hz, 60 Hz or 400 Hz, +/- 0.1 percent regardless of load, input voltage or temperature. The RUPS-1250 can be rack-mounted in a standard 19" equipment rack.

*"Our customers asked for a UPS that could be used anywhere in the world, while providing clean AC with back-up provisions, and Behlman delivered," explained Behlman Vice President of Sales and Marketing Ron Storm. "By providing a rugged, true on-line UPS powered from virtually any available AC – while ensuring no break in power -- the RUPS-1250 ideal for most high-end industrial and military requirements, including aerospace, mobile, ground and shipboard applications. Now, not only can we meet any AC to AC signal requirement, but we can also supply frequency conversion with back-up capability."*

Introductory price is \$7,995, with delivery in July 2008.

Behlman Electronics Inc., a subsidiary of Orbit International Corp., manufactures and sells high quality standard, modified standard, custom and COTS power solutions, including AC power supplies, frequency converters, inverters, DC-DC, AC-DC, DC-AC, and uninterruptible power supplies.

Orbit International Corp., (NASDAQ:ORBT), based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications.
