**ORBIT INTERNATIONAL RECEIVES NEW ORDERS TOTALING
APPROXIMATELY \$2,000,000**

Orders Are For Both Orbit's Power and Electronics Groups

Hauppauge, New York, July 16, 2014 -- Orbit International Corp. (NASDAQ:ORBT), an electronics manufacturer and software solution provider, today announced that its Power and Electronics Groups have received both new and follow-on orders totaling approximately \$2,000,000.

Total new orders received by the Power Group approximated \$1,200,000. The first order, valued at \$738,000, is a follow-on order for a power supply used in oil and gas exploration. Behlman has been supplying its customer this unit since 1995 and to date has shipped well over 1,500 units. Deliveries are scheduled to begin in the first quarter of 2015 and continue through the fourth quarter of 2015.

The second order, valued at approximately \$184,000, is for a COTS power supply that is part of an ongoing missile system upgrade program for which Behlman received its initial order in July 2009. This follow-on order brings the total value of orders received for this program in 2014 to over \$1.5 million. Deliveries are scheduled for the second quarter of 2015. Furthermore, based on information from its customer, additional orders may be expected in 2014.

The third order, valued at approximately \$272,000, is a follow-on order for a COTS power supply used on the RC-135, a U.S. Air Force all-weather airborne reconnaissance aircraft. Over the six-year life of this program, the Power Group has received orders for these power supplies valued at over \$3 million. Deliveries are scheduled to begin in the fourth quarter of 2014 and continue through the second quarter of 2015.

Ron Storm, President of Orbit's Power Group commented, "Our commitment to producing products of the highest quality and reliability has enabled us to maintain these long-term business relationships. We have been a reliable source of supply on a number of programs for over 15 years and we remain confident we will continue to be the supplier of choice for power products on these programs."

Two new orders received by the Electronics Group approximated \$800,000. The first order approximating \$425,000 was a follow-on award for an overseas military application. Deliveries are

expected in the fourth quarter of 2014 and to continue through the first quarter of 2015. The second order, valued at approximately \$375,000 represents a new design effort including qualification units in support of an emerging program. Based on indications from the customer, production quantities for this program could be approximately \$4,000,000. Deliveries under this initial contract are expected to commence in the third quarter of 2015 and continue through the fourth quarter of 2015.

Mitchell Binder, President and CEO of Orbit International commented, "We are encouraged by these new orders for both our Power and Electronics Groups as our delivery schedules for 2015 are improving. Our Power Group continues to receive follow-on awards for its legacy products and our Electronics Group received an award on a new engineering effort which we believe will result in a considerable amount of business for the future. Our bid and proposal pipeline continues to grow for our Electronics Group although timing remains uncertain. In addition, we are continuing to monitor our costs to maximize our operating margins."

Orbit International Corp. is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications through its production facility in Hauppauge, New York and designs and manufactures combat systems and gun weapons systems, provides system integration and integrated logistics support and documentation control at its facilities in Louisville, Kentucky. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units, AC power sources, frequency converters, uninterruptible power supplies and associated analytical equipment. The Behlman military division designs, manufactures and sells power units and electronic products for measurement and display.
