Behlman Electronics announces that is now Certified to ISO 9001:2008 Quality Management System standards.

Certification considered the “icing on the cake” by a company that has consistently provided some of the world’s most reliable power supplies

Hauppauge, New York, April 7, 2015 — Behlman Electronics Inc., a leading provider of standard, modified standard, COTS and custom power supplies, is proud to announce that it has met all the requirements necessary to be awarded ISO 9001:2008 certification for its Quality Management System, for the design, manufacture and repair of AC power sources, frequency converters, inverters, DC-DC, AC-DC, DC-AC, and uninterruptible power sources (UPS) for commercial, industrial and military applications.

Effective March 27, 2015, Behlman received ISO 90001:2008 Certificate Number FM 615291 from BSI, the first and oldest ISO registrar.

About ISO 9000:2008

ISO 9001:2008 sets out the criteria for a quality management system that has been implemented by over one million companies and organizations in over 170 countries.

It sets standards that are based on a number of quality management principles including a strong customer focus, the motivation and involvement of top management, the process approach and continual improvement. Using ISO 9001:2008 helps ensure that customers get consistent, good quality products and services, which in turn brings many business benefits.

To achieve certification to the ISO 9001:2008 standard, an organization must perform internal audits to check how its quality management system is working. An organization may decide to invite an independent certification body, such as BSI, to verify that it is in conformity to the standard. It is such a certification body that issues the Certificate of Registration.

-MORE-

Making the announcement from Behlman Headquarters in Hauppauge, New York, President Ron Storm said, *“Adding ISO 9001:2008 to our quality management system is the ‘icing on the cake,’ because Behlman has made quality management the key to its success and the success of its customers’ power solutions, for more than 50 years.*

Now with more formalized quality management programs in place, our customer service, process controls and product reliability can be expected to be even better.

Documenting how Behlman meets the stringent standards of ISO 9001:2008 was no easy task. I am very proud of the way everyone at Behlman did their part to reach this major milestone in our continuous effort to meet our customers' power requirements better than ever before. Today, no matter where you look in our facility, you see evidence of exceptional dedication to our customers' needs before, during, and after the sale."

Behlman Electronics, Inc., now an ISO 9001:2008 company, is a subsidiary of Orbit International Corp., and the basis of the Orbit Power Group.

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. The Orbit Electronics Group includes Orbit Instrument, Tulip Development Laboratory, and Integrated Combat Systems.
