

P2002

FEATURES

- Low output THD
- Unique overload protection
- Remote programming with RS232 standard; RS232/ USB/ Ethernet or IEEE-488 available

CLEAN AC POWER WITH MICROPROCESSOR CONTROL AND VACUUM FLUORESCENT DISPLAY

In the P2002 you'll find the quality features you expect from Behlman; fully adjustable voltage and frequency, low-output THD, high efficiency, plus excellent line and load regulation. There's also a unique overload protection system that fold's back voltage to maintain rated current without output waveform distortion. The unit can be controlled with the front panel pushbuttons or remotely using the standard RS232 interface.

Available options include extended frequency range, rack mount kit, either IEEE-488 or RS-232/USB/ Ethernet interface.

Small size, quiet operation and high efficiency make the P2002 ideal for industrial product testing, precision avionic test, power conversion and Automatic Test Equipment testing.

INPUT

Voltage: 120 VAC, +/- 10%
Frequency: 47-63 Hz (Option for 400 Hz input)

OUTPUT

Power: 2000 VA
Voltage: 0-135 V or 0-270 V
Frequency: 45-500 Hz (Option E: 45-1000 Hz)
Current: 15 Amps, 0-135 V Range,
7.5 Amps, 0-270 V Range
Current limit: Settable from 0 to maximum amps
Crest Factor: 3:1
Power Factor: 100% of rated output into any
power factor load
Distortion: 1.0% THD typical, measured at full load,
115 Volts, 60 Hz
Line Regulation: +/- 0.1% for +/- 10% line change
Load Regulation: +/- 0.7%, no load to full load
Efficiency: 80% typical

PROTECTIVE CIRCUITS

Input: Circuit Breaker
Constant Current: Overload automatically causes voltage
fold-back to provide maximum current
without distorting output waveform
Short Circuit: Short circuit overload electronically
latches output open to protect load...
power restored by recycling input power
Thermal: Internal temperature sensor prevents
heat damage
Over voltage: Voltage in excess of 20% of maximum
electronically latches output to protect
load... power restored by recycling input
power
Current Limit: Adjustable from 10% to full scale via front
panel. Output will latch open if limit is
exceeded.

CONTROLS / INDICATORS

Power On/Off: Circuit Breaker
Display: Vacuum fluorescent display with 24
characters x 2 lines. Displays volts,
amps, frequency and current limit.
Fault indication for over voltage
(O/V), over current (O/I), over
temperature (O/T), constant current
(C/C) and overload latch (O/L),
Watts (W), power factor (PF)
Shift push-button: Set resolution; 0.1, 1.0, 10.0, 100.0
Mode push-button: Selects the parameter required
Up push-button: Increment up
Down push-button: Increment down
Reset: Reset system to default setting
Output On/Off: Push button switch
Range: Push button switch (High/Low)
Local/Remote: Recessed slide switch
Indicators: Output on, high range, busy
Remote interface RS232 (see options)
Settings and measurements: See Table 1 (reverse)

MECHANICAL & ENVIRONMENTAL

Dimensions: High-strength bench top chassis
with removable rubber feet,
5.25"H x 17"W x 21"D
(13.3 cm x 43.2 cm x 53.3 cm)
Weight: 65 lbs (29.5 kgs)
Operating Temperature: 32° to 131° F (0° to 55° C)
Cooling: Internal fans. Air flow front to
rear.
Input Connections: Twist-lock receptacle supplied
with plug and six foot line cord
with unterminated end
Output Connections: Enclosed terminal block on rear
Remote Interface: DB-9

Table 1: P2002 Settings and Measurements

	Setting Resolution	Accuracy
Voltage	0.1 V	+/- 0.5% of full scale +/- 1 LSB (45-500Hz) +/- 0.7% of full scale +/- 1 LSB (500-1000Hz)
Frequency	0.1 Hz	+/- 0.1 Hz
Current	NA	+/- 1% of full scale +/- 0.1 A
Current Limit	0.1 A	+/- 0.2 A
Watts	NA	+/- 2.5% of full scale (150 W to FS)
Power Factor	NA	+/- 0.035 (150 W to FS)

Fault indications for the following:

- O/V: Over Voltage
- O/I: Over Current
- O/T: Over Temperature
- C/C: Constant Current
- O/L: Overload latch

OPTIONS: Contact factory for additional options.

- 400:** 400 Hz input (350-440 Hz)
- E:** Extended frequency range, 45-1000 Hz
- I:** IEEE-488 interface
- RM:** Rack Mount kit
- U:** USB, Ethernet and RS232 using SCPI protocol
