ORBIT INTERNATIONAL'S POWER UNIT SEGMENT  
RECEIVES \$280,000 IN NEW COMMERCIAL ORDERS

Hauppauge, New York, May 13, 2003, 2003—Orbit International Corp. (NASDAQ:ORBT) today announced that its Power Unit Segment, Behlman Electronics, Inc., has received several new orders totaling approximately \$280,000 for its commercial division. Deliveries under these orders are expected to commence in this second quarter and continue into 2004. These orders represent Behlman's effort to diversify its commercial division's business into areas other than the manufacturing sector.

Behlman received a follow-on order from a major utility company for inverters used to power substation electronics. Although the order is for only \$100,000, it is significant because it represents Behlman's continued progress in penetrating the utility market. Furthermore, the Company believes the requirements of this customer could result in significant re-orders for the next several years. Another order, also for approximately \$100,000, is for a railroad signaling application. Behlman's power sources are highly regarded in the railroad signaling market, which has allowed Behlman to gain significant market share. Finally, the Company booked another \$80,000 to other markets including equipment sold internationally to the food processing industry.

Dennis Sunshine, President and CEO of Orbit, commented, "Behlman's budgeted sales growth for 2003 is primarily from Behlman's custom division. We are hopeful that these new orders will begin a pattern of improvement in our commercial business that will only add to the strong revenues expected from our custom division."

Sunshine continued, "We believe these orders are an indication that Behlman's overall diversification strategy is working and that our platform design concept is a key to our success by being able to reconfigure our products to meet application requirements in a range of new commercial markets."

Orbit International Corp., based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Its Behlman Electronics, Inc. subsidiary manufactures and sells high quality commercial power units, AC power sources, frequency converters, uninterruptible power supplies and associated analytical equipment. The Behlman custom division designs, manufactures and sells power units and electronic products for measurement and display. For a more detailed discussion of the risks inherent in the Company's business the reader is referred to the Company's Annual Report on Form 10-KSB for the fiscal year ended December 31, 2002.

This press release contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including the expected delivery dates under the new contracts, the potential for future re-orders for Behlman's inverters from a certain customer over the next several years, the potential of these new orders beginning a pattern of improvement to Behlman's commercial business and strong revenues expected from Behlman's custom division. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause the actual future results of the Company to be materially different from such forward looking statements. Factors that might result in such differences include, without limitation, the current economic climate and military conflicts, variable market conditions and changing needs of the defense sector and the Company's customers. The forward-looking statements contained in this press release speak only as of the date hereof. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
