## **Behlman BL1500 Down-Hole Power Supply has proven to be an essential tool for oil exploration in even the most hostile environments.**

***Remote monitoring and control enables use in locations too hazardous for deployment of full-time, on-site operators.***

Hauppauge, New York, February 21, 2012— Behlman Electronics Inc. known in the oil industry for its ultra-reliable power supplies that enable companies to power AC equipment up to five miles “down-hole” in even the most adverse field conditions, has announced that additional orders have been received for their Model BL1500 This brings oil industry-wide global total to over 1600 units.

The BL 1500 is part of a broad line of Behlman power supplies that support oil exploration, drilling, evaluation, completion and intervention.

According to Ron Storm, Behlman’s Vice President of sales and marketing, “*The market may be driven by the escalating cost of fuel, but it is the remarkable achievements of Behlman’s engineers that have driven our BL 1500 to be recognized as the oil industry’s power supply of choice. The number of follow-on orders we receive each year proves the point.*”

Behlman’s BL1500 unit is powered from 115 VAC, 47-63 Hz and provides two ranges of high-voltage AC at 60 Hz. Units can be stacked for increased power. Protective circuits include input, short circuit, constant current and thermal protection. BL1500 power supplies have an RS 485 interface that allows the unit to be controlled and monitored remotely from a central station. It operates from 32 to 131 degrees F (0 to 55 degrees C), and has a high-strength 19-inch rack mount chassis 3.5” high x 21.5” deep (48.25 cm wide x 7.874 cm high x 54.61 deep D).

Because Behlman designs and manufactures a very broad line of power products for diverse industrial, commercial and military applications, it can readily help oil industry companies meet their power needs during every phase of operations.

## About Behlman

Behlman Electronics, Inc. ([www.behlman.com](http://www.behlman.com)), a subsidiary of Orbit International Corp., manufactures and sells high-quality standard, modified standard, custom and COTS power solutions, including AC power supplies, frequency converters, inverters, DC-DC, AC-DC, and DC-AC power supplies, and UPS (uninterruptible power supply) units. Behlman provides power consultations, at no charge, for government contractors and industrial and commercial organizations worldwide.

Orbit International Corp., ([www.orbitintl.com](http://www.orbitintl.com)), based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Other subsidiaries include Orbit Instrument, Tulip Development Laboratory, and Integrated Combat Systems.

For more information contact Behlman Electronics, Inc., 80 Cabot Court, Hauppauge, New York 11788 USA; TEL: +1 631 435-0410; FAX: +1 631 951-4341; [sales@behlman.com](mailto:sales@behlman.com); [www.behlman.com](http://www.behlman.com).

-END-

Behlman BL-1500 Power Supplies have been deployed by the oil industry for more than a decade, where they have proven to be rugged and highly-reliable as they power AC equipment up to five miles from the power source.
