The P2001 delivers 2000 VA of clean, regulated AC power in a 5.25” high bench top unit that easily converts to rack mount, for far less than competitive models.

In the P2001 you’ll find the quality features you expect from Behlman; fully adjustable voltage and frequency, low-output THD, high efficiency, plus excellent line and load regulation. There’s also a unique overload protection system that folds back voltage to maintain rated current without output waveform distortion.

The unit can be controlled from the front panel or remotely using the optional 0-10 VDC, RS232 or IEEE-488 interface. Other options include extended frequency range, 45 Hz to 1000 Hz and rack mount kit.

Small size, low cost, quiet operation and high efficiency make the P2001 ideal for industrial product testing, precision avionic test, power conversion and Automatic Test Equipment testing.
OPTIONS: Contact factory for additional options.
A: Analog remote control...0-10 VDC for volts and frequency...contact closure for range and output
E: Extended frequency range, 45-1000 Hz
I: IEEE-488 interface
IR: RS 232 interface
L: Locking pots for volts & frequency
RM: Rack Mount kit
S: Slides
400: 360-440 Hz input frequency
