60 KVA OF AC POWER IN A CABINET ONLY 27”W X 36”D

Behlman’s BL Plus solid state AC power frequency converter offers greater efficiency, reduced downtime, and a significantly smaller footprint and easier installation than the motor generator it is designed to replace. The BL Plus has all the quality features you expect from Behlman; fully adjustable voltage and frequency, low output THD, high efficiency plus excellent line and load regulation. There’s also a unique overload protection system that folds-back voltage to maintain rated current without output waveform distortion. The BL Plus optional manual controller has three DMM’s for volts, frequency and current and a oscillator that has three fixed frequencies of 50 Hz, 60 Hz and 400 Hz as well as a variable frequency of 45-500 Hz. Optional analog remote control is available with the standard controller or you can opt for the Programmable Controller with RS232 interface standard or optional IEEE-488.

Small size, easy installation, quiet operation and high efficiency make the BL Plus ideal for industrial product testing, precision avionic test, power conversion, ATE, bulk power and motor generator replacement.

Protective Circuits

Input: Electron ic circuit breaker
Constant Current: Overload automatically causes voltage fold-back to provide maximum current without distorting output waveform
Short Circuit: Short-circuit overload electronically latches output open to protect load... power restored by recycling circuit breaker
Thermal: Internal temperature sensor prevents heat damage by turning output off...output will turn on when reaching safe temperature

Controls / Indicators

Power On/Off: Push to start...push to stop
Line drop compensation: Three recessed potentiometers for 10% adjustment phase A, B, C
